CURRENT SERIAL RECORDS

FEED GRAIN, FOOD GRAIN, OILSEED STOCKS - ALL LARGER

Stocks of the four feed grains (corn, oats, barley, and sorghum grain) on January 1, 1970 totaled 164.4 million tons compared with 160.9 million a year earlier and 157.4 million on January 1, 1968. Sorghum holdings were below a year earlier, but the decline was more than offset by increases for corn, oats, and barley. Total stocks of wheat and rye are 46.6 million tons-- up 14 percent from a year earlier. All wheat stocks were the highest for the date since 1964. Oilseed stocks (soybeans and flaxseed) totaled 32.3 million tons--up 10 percent from January 1, 1969. Soybean stocks are record high for the date.

All wheat in storage on January 1, 1970 totaled 1,527 million bushels, 13 percent above a year earlier and the largest for the date since 1964. Farm stocks were record large at 608 million bushels and nearly 5 percent above January 1, 1969. Off-farm stocks at 919 million bushels were 20 percent above a year earlier and the largest for the date since 1966. Disappearance from all storage positions during the 1969 October-December quarter is indicated at 344 million bushels compared with 339 million a year earlier. Of the total January wheat stocks, the Commodity Credit Corporation owned 169 million bushels and had loans outstanding on 706 million more.

▲ Durum wheat stocks in all positions on January 1, 1970 totaled 111.9 million bushels, 30 percent above a year earlier and the largest January stocks on record since estimates began in 1962. Stocks on farms at 90.9 million bushels were up 40 percent from a year earlier but off-farm stocks of 21.0 million bushels were slightly lower. Disappearance during the 1969 October-December quarter totaled 17.3 million bushels compared with 23.4 million bushels a year earlier.

Rye stocks in all positions on January 1 totaled 29.6 million bushels, compared to 24.3 million a year ago and 38.3 million on October 1, 1969. Off-farm stocks at 18.6 million bushels are 20 percent above holdings a year ago but 2 percent below January 1968.

Data used for estimating farm stocks as of January 1, 1970 were collected from the sample of farmers used in past years, plus a new probability-based sample in the 12 North Central States. The use of both samples is planned for the April 1, 1970 stocks report.

UNITED STATES DEPARTMENT OF AGRICULTURE

Statistical Reporting Service
Gr Lg 11-1 (1-70)

Crop Reporting Board
Washington, D. C. 20250

Farm stocks totaled 11.0 million bushels compared with 8.9 million on hand January 1, 1969. Total disappearance during the October-December quarter was 8.6 million bushels compared with 7.4 million a year earlier. Of the total rye stocks, the Commodity Credit Corporation owned 11.7 million bushels and had loans outstanding on an additional 4.8 million.

Corn stocks in all storage positions on January 1, 1970 totaled 4,313 million bushels--up 2 percent from a year earlier. Off-farm stocks of 992 million bushels were 4 percent above a year earlier, and farm holdings at 3,321 million bushels were up 1 percent from a year ago. Indicated disappearance from all positions during the past 3 months (October-December) was 1,378 million bushels. Of the total January 1 corn stocks, the Commodity Credit Corporation owned 296 million bushels and had loans outstanding on 567 million more bushels.

Oat stocks in all positions on January 1, 1970 totaled 884 million bushels--13 percent above a year earlier and 35 percent above January 1, 1968. Off-farm stocks totaled 161 million bushels, up sharply from the 123 million a year earlier. Farm holdings were 723 million bushels compared with 661 million last year--up 9 percent. Disappearance from October through December totaled 140 million bushels compared with 153 million a year earlier. Of total oat stocks, the Commodity Credit Corporation owned 76 million bushels and had loans outstanding on 194 million more bushels.

Barley in storage January 1, 1970 totaled 419 million bushels, 13 percent above a year earlier, and the largest January stocks on record. Farm holdings, at 258 million bushels, were 4 percent above a year earlier and also a record high. Off-farm stocks at 161 million bushels were 30 percent above January 1969. Disappearance from all storage positions October through December was 78 million bushels, 5 million bushels below a year earlier. Of the total barley stocks, the Commodity Credit Corporation owned nearly 49 million bushels and had loans outstanding on 106 million more bushels.

^{1/} Off-farm total plus farm stocks. October 1968 through October 1969 revised.

Flaxseed: Flaxseed stocks in all storage positions on January 1, 1970 totaled 32.7 million bushels--52 percent more than a year earlier. Farm stocks at nearly 13.6 million bushels were 49 percent greater than on January 1, 1969; off-farm stocks at 19.1 million bushels were 54 percent greater. Current stocks indicate a disappearance during the last half of 1969 of about 13.6 million bushels from a supply of 46.2 million bushels (carryover of 9.8 million plus 1969 production of 36.4 million bushels). Reported disappearance for the half year included about 7.5 million bushels crushed and 6.0 million exported.

The Commodity Credit Corporation owned 7.7 million bushels and had loans outstanding on an additional 9.4 million.

(Continued on page 28)

Off-Farm Grain Storage Capacity

Capacity of off-farm commercial grain storage in the United States was 5,637 million bushels on January 1, 1970--98 million bushels more than a year earlier. Off-farm storage capacity generally increased in 1969 in the major corn producing States and in most South Atlantic and South Central States. Changes in capacity in most States were small, although Illinois, Minnesota, Iowa, and Kansas each showed an increase of more than 10 million bushels. Largest gains were 21 million in Illinois and 34 million in Iowa. Capacity in the North Atlantic region declined slightly during 1969. Texas and Kansas continue to rank first and second in off-farm storage, together they equal almost 30 percent of the U.S. total. Illinois, Nebraska, and Iowa ranked third, fourth, and fifth with 25 percent of the Nation's total.

Capacity data, by States, include all elevators, warehouses, terminals, merchant mills, other storages and oilseed crushers which store grain, flaxseed or soybeans. Capacity data exclude CCC bins, warehouses used to store only rice or peanuts, oilseed crushers processing only cottonseed or peanuts, tobacco warehouses, seed warehouses, and storages that handle only dry beans or peas.

Sorghum grain stocks totaled 692 million bushels on January 1, 7 percent below a year earlier. Farm holdings, at 189 million bushels, were down 15 percent from a year earlier. Off-farm holdings at 503 million bushels were down 4 percent. January 1 stocks indicate October-December disappearance of 340 million bushels -- up sharply from the 284 million disappearance for the same quarter a year earlier. Of the total sorghum grain stocks, 188 million bushels were owned by the Commodity Credit Corporation, and CCC loans were outstanding on an additional 76 million bushels.

Soybean stocks in all storage positions on January 1, 1970 totaled a record 1,048 million bushels, 9 percent above a year earlier. Off-farm stocks of 680 million bushels were up 24 percent, but farm stocks at 368 million bushels were down 10 percent. Of the total soybean stocks, the Commodity Credit Corporation owned 178 million bushels and had outstanding loans on an additional 257 million bushels.

Stocks on January 1, 1970 indicate a disappearance during the 1969 September-December period of 394 million bushels from a beginning supply of 1,441 million bushels (carryover of 324 million bushels plus 1969 production of 1,117 million bushels). During the past four months, approximately 236 million bushels were processed for oil and about 160 million bushels were exported.
